EXPERIENCES

INFOLABZ IT SERVICES PVT LTD

Gujarat - Internship (July 2023 – August 2023)

- During my internship at Infolabs, I worked on Real-Time API handling with React, developing interactive web applications with live updates.

PROJECTS

Bangloreautomation business Website

Freelancing Project on Fiverr (January 2023)

- I developed a product-selling website on WiX.com, showcasing all their products and enabling direct customer contact.

Real Time Headlines

Internship Project (July 2023)

- This is basically the webpage that actually fetches the data from live API and showcases the data to the webpage. Changing in API will also update the relevant webpage data showcasing.

ZNL Software Solutions

Freelancing Project (September 2023)

- Crafted the engaging website based on HTML, CSS, JS & PHP. Clients can select the website type they want to build for their business and make the estimation cost of the entire project.

Services at Fingertips

GTU Design Engineering Project (June 2022)

- As a frontend developer, responsible for creating an eye-catching and user-friendly interface for a multi-service home services platform, with some assistance in backend development.
